

WAR IN UKRAINE

DISRUPTS HIV & TB PROGRAMS

As health systems collapse, Ukraine's hard won progress against HIV, tuberculosis (TB), multi-drug resistant TB and COVID-19 is under threat.

HIGHEST RATE OF TB IN EUROPE

30,000 new cases of TB every year

Drug resistant TB represents around **27.9%** of new TB patients

MILLIONS DISPLACED, HEALTH SYSTEMS UNDER ATTACK

SECOND LARGEST HIV EPIDEMIC IN EASTERN EUROPE & CENTRAL ASIA

260,000 people living with HIV in Ukraine

180,000 people living with HIV who know their status

76% decline in AIDS-related deaths since 2010

Since 2003, the Global Fund has invested more than \$830 million to fight HIV and TB in Ukraine and recently approved an additional \$15 million in emergency funding to support the continuity of HIV and TB services.

NOTES: [UNAIDS 2020: Ukraine country profile](#)

- 260,000 people living with HIV in Ukraine; 76% decline in AIDS-related deaths since 2010; 180,000 people living with HIV who know their status.

[UNAIDS Press Release:](#)

- Drug resistant TB represents ~27.9% new TB patients and 43.6% of previously treated patients and treatment success of multi-drug resistant TB is ~50%

[Reuters/ Stop TB](#)

- Ukraine has about 30,000 new cases of TB every year

[Global Fund Results \(Data Explorer\)](#)

- 146,488 people on antiretroviral therapy for HIV (2020) patients; 18,798 people with TB treated (2020); \$850 million invested by Global Fund since 2002
