

Don't leave millions of lifesaving \$ (CAD) on the table

Canada should increase its commitment to the Global Fund by 30% alongside other donors.

Every \$100 million (CAD) short of this goal would leave \$50 million (CAD) on the table.

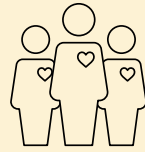

The United States has pledged US\$6 billion, but its contributions must be matched two to one to unlock the total funding.

The Global Fund needs to raise \$18 billion to get back on track against AIDS, TB and malaria and strengthening health systems.

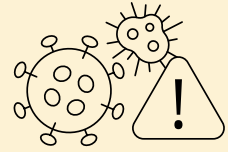

Estimates are derived from the modelling conducted to estimate impact of the Global Fund 2023-2025 Investment Case. The Global Fund supports a range of interventions recommended by technical partners, which go beyond those presented in the results here. The results reflect contributions of Global Fund investments to national programs and their results; these results are achieved together with partners.

\$100 million CAD contribution purchases the aggregate of the commodities listed above.

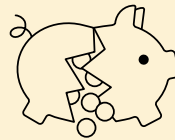

For every \$100 million (CAD) invested in the Global Fund:

Saves 85,000 lives through programs supported by the Global Fund.

Averts 1.9 million new infections or cases across the three diseases.

Creates \$2.9 billion (CAD) in economic returns through health gains.

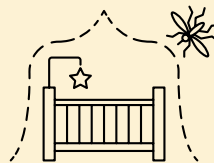

Provides malaria treatment for 1.2 million people.

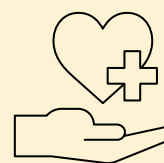

Provides medicine for 11,000 mothers to prevent transmitting HIV to their babies.

Provides TB treatment and care for 73,000 people and screen 1.4 million people for the disease.

Distributes 7.0 million mosquito nets to protect children and families from malaria.

Provides antiretroviral therapy for 117,000 people and HIV counselling and testing for 3.2 million people.
